

Environmental Policy

1. In operating our environmental management system, we establish measurable environmental objectives and targets wherever possible. Based on changing conditions and available information, we conduct regular reviews and promote continuous improvement to reduce environmental impact and contribute to environmental conservation.
2. We aim to coexist with local communities and build a resource-circulating company that continues to produce high-quality wire products. We accurately assess the environmental impact of our business activities and, within technically and economically feasible limits, focus on the following areas:
 - Efficient use of resources and energy
 - Reduction, proper treatment, and recycling of waste
 - Pollution prevention measures
3. We comply with all applicable environmental laws, regulations, agreements, and other requirements, and strive to prevent environmental pollution.
4. We conduct internal environmental audits to verify our activities and work to maintain and improve our environmental management system.
5. This environmental policy is communicated to all employees and made available to the public.
